KENNETH ANAK ROBIN

Australia Malaysia Virtual PhD Internship Program - 2023

Development and Effectiveness of the Interactive Multimedia Learning Software i-Tutor Bahasa Melayu (i-Tutor BM) for Form 1 Students in Rural Secondary Schools in Sarawak.

Thesis Outline

i-Tutor BM software is a game-changing tool for teaching Malay grammar to rural Form 1 students. Using ADDIE and DDR, it includes a Syntax Calculator that simplifies sentence structure.

Supervisors & Institutions

Prof. Dr. Sabariah binti Sharif
Universiti Malaysia Sabah

Dr. Tiffani Apps

Future Goals

My future goals are to advance innovative research in education technology, foster international collaboration,and contribute to inclusive digital learning solutions that bridge educational gaps, especially in underserved communities.

AMVPIP Experience

My AMVPIP experience empowered my research through valuable exposure and academic support. It fostered international networking and collaboration, allowing me to connect with diverse scholars. The program enriched my research approach by facilitating knowledge exchange and sharing of expertise. It enhanced my academic growth and global perspective.

Key Takeaways

1) Research Empowerment – Gained valuable insights, tools and motivation to strengthen and refine my ongoing research.
2) Global Networking – Built meaningful connections with international scholars for future collaborations and knowledge exchange.
3) Cultural & Academic Enrichment – Experienced a rich academic culture through sharing ideas, expertise and diverse perspectives.
